-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Detailed Action**

***Claim Objections***

Claims 6, 7, 11, 14, 16, 24 and 26 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4, 6-12, 15, 18-22 and 24-26 are rejected under 35 U.S.C. 102(a) as being anticipated by Pouchak (6,647,302). See col. 13, line 30 to col. 14, line 47. Regarding claim 4, see col. 13, line 41. Regarding claims 6, 7 and 11, see 300. Regarding claim 25, see col. 14, lines 21-34.

Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Shprecher et al. (5,042,431). See col. 4, line 53 to col. 5, line 2.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pouchak '302 in view of Pouchak (6,536,678). Pouchak '302 discloses all of the limitations of the claim(s) except for equalizing the time in which the stages are active. Pouchak '678 discloses the presence of equalizing the time in which the stages are active. See claim 17. Hence, one skilled in the art would find it obvious to modify the system of Pouchak '302 to include the equalizing the time in which the stages are active of Pouchak '678 for the purpose of energy conservation.

Regarding claims 13, 14, and 23, Pouchak '302 discloses all of the limitations of the claim except for disabling a sub-method to activate/deactivate stages for various time periods. However, since the applicant has failed to establish any criticality or synergistic results which are derived from the recited configurations, these limitations are considered a matter of obvious design choice. Thus, the applicant's design configurations would have been an obvious improvement to one of ordinary skill in the art with regard to the apparatus disclosed in Pouchak '302.

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derek S. Boles at (571) 272-4872.
